

Metal Cantilever Roller Information:

Materials:

Tubes:

- Carbon Steel, Galvanized Steel, Stainless Steel, Aluminum

Tubes Finishes:

- Zinc and Nickel Plating
- Anodizing
- Polished
- Electropolished
- Passivated

Drive Options:

- Grooves

Cover Options:

- Urethane Sleeves
- HDPE
- UHMW
- PVC

Shaft Materials:

- Carbon Steel
- Stainless Steel
- Aluminum
- Zinc and Nickel Plating Available

Shaft Configurations / Options:

- Hex, Round
- Threaded or Standard Finish

Bearings:

Commercial Grade Ball Bearings: Carbon Steel and Stainless Steel with or without labyrinth seal systems on the extended shaft end depending on tube configuration.

ABEC-1 Precision Bearings: Chromium alloy steel or Stainless Steel ball bearings in an engineered conductive plastic housing with a labyrinth seal system on the extended shaft end.
